

SOS MARINE

SOS TACTICAL LOAD BEARING EQUIPMENT VEST

SOS Marine's purpose-made these tactical equipment vests designed to withstand demanding operational requirements by giving the wearer excellent manoeuvrability whilst carrying their required equipment.

SOS designed a load bearing vest to cater for a female employee concerning **OH&S** for the Australian Federal Police. This required the moving of her equipment from the waist belt to a vest.

Tactical Load Bearing Equipment Vests

Design features

The vest is manufactured from highly breathable, heavy duty 250D polyester providing ventilation for the user

Several pouches are custom-designed for special working requirements

- The vests are available in small and large sizes and have sufficient adjustment to fit most users and to fit over ballistic vest.
- Number 10 heavy duty Zipper
- Quick release key loop with eyelet
- Includes a 3 litre drinking bladder (hands-free) in the rear of the vest.
- First Aid pouch, upper vest rear
- Mesh Cargo Pouch, lower vest rear
- 2 Zippered Map pockets, Radio pouch, left rear
- Small GPS/Utility Pouch with lanyard point, upper front left
- 2 Battery / Phone / GPS / small torch pouches lower front left
- Large Notebook / Utility pouch with side access pen pocket right

Managing Heat Stress in workplaces

Heat stress is a medical emergency.

SOS Marine recognises how important it is to stay hydrated, particularly when working outdoors. Often it is not convenient to access a water source.

This Tactical Vest is provided with an optional 3 litre personal hands-free hydration system which is placed in the rear of the vest rear.

In an **emergency situation**, there is a quick and easy ability to immediately replenish your team's water supply by refilling the water bladder.

This simple innovation assists the **carbon footprint** associated with bottling and transporting plastic water bottles.

This personal drinking bladder may be easily removed from the rear of the vest and replaced if worn by a new team member
